TECHNICAL INFORMATION 87

COLECCIÓN LED

Colección de listelos, perfiles y peldaños antideslizantes especialmente diseñados para albergar sistemas de iluminación mediante diodos LED.

Nuevos modelos que facilitan la incorporación de iluminación LED a sus ambientes más exclusivos y zonas que requieran ser especialmente visibles como las escaleras.

LED COLLECTION

A range of trims, Profiles and step-treads especially designed for LED illumination systems. New models that facilitate the incorporation of LED lighting into your most exclusive areas, and in settings that require special visibility, such as stairways.

COLLECTION DE LED

Collection de listelos, profils et marches antidérapantes spécialement conçus pour les systèmes d'éclairage utilisant des diodes à LED.

De nouveaux modèles facilitant l'intégration de l'éclairage LED dans les environnements les plus exclusifs et les zones devant être particulièrement visibles comme les escaliers.

COLLEZIONE LED

Collezione di listelli, profili e gradini antiscivolo appositamente progettati per ospitare sistemi di illuminazione a LED. Nuovi modelli che facilitano l'integrazione dell'illuminazione a LED negli ambienti più esclusivi e nelle aree che richiedono una visibilità speciale come le scale.

PERFILES DE PVC

Nuestra historia comienza hace 30 años fabricando perfiles de PVC. La amplia gama de colores lisos y marmoleados permite a nuestros colaboradores cubrir cualquier exigencia de sus clientes.

PVC PROFILES

Our trajectory began 30 years ago with the manufacture of PVC trims. The wide range of plain and marble colours means our clients can meet a wide range of demands from their customers.

PROFILÉS EN PVC

Leader historique depuis 30 ans dans la fabrication de PVC. Notre large gamme de couleurs standards ou colorés permettent à nos partenaires de couvrir tous les besoins d'une clientèle exigeante.

PROFILI IN PVC

La nostra storia è iniziata 30 anni fa fabbricando profili in PVC. La ampia gamma di colori tinta unita, marmorizzati permette ai nostri partner di poter andare incontro a ogni esigenza della clientela.

SISTEMAS DE NIVELACIÓN

Sistema diseñado para nivelar y espaciar las piezas cerámicas de gran formato durante la instalación de revestimientos y pavimentos. Este sistema permite instalaciones perfectas sin desniveles y de ancho de junta uniforme. El espesor del clip determinará la anchura de la junta entre las piezas, mientras que la cuña aportará una nivelación perfecta entre las baldosas cerámicas una vez colocada en el clip.

LEVELLING SYSTEMS

A system designed to level and space large format wall and floor tiles. With this system say goodbye to lippage with perfectly levelled and perfectly spaced tiles. The thickness of the clip determines the width of the tile joint, with the insertion of the wedge into the clip giving a perfect level finish.

SYSTEMES DE NIVELLEMENT

Système conçu pour le nivellement et l'espacement de pièces céramiques de grand format lors de l'installation de revêtements et trottoirs. Ce système permet des installations parfaites sans inégalités et avec un joint uniforme. L'épaisseur du clip détermine la largeur du joint entre les pièces, tandis que le coin assure un nivellement parfait entre les carreaux de céramique une fois placés dans le clip.

SISTEMI DE LIVELLAMENTO

Sistema progettato per livellare e posizionare pezzi ceramici di grande formato durante l'installazione di rivestimenti e pavimentazioni. Questo sistema permette installazioni perfette senza dislivelli e giunti uniformi. Lo spessore della clip determinerà la dimensione del giunto tra i pezzi, mentre il cuneo fornirà un perfetto livellamento tra le piastrelle una volta posizionate sulla clip.

INSTRUCCIONES USO - INSTRUCTIONS - ISTRUZIONI

1. Aplicar el clip con la base bajo la pieza cerámica. Apply the clips underneath the ceramic tiles while laying.

2. Insertar la cuña en el clip ajustándola con la mano. Insert the wedge in the clip adjusting by hand.

3. Regular la anchura de la pinza y el limitador de recorrido del alicate (rosca superior). Regulate the position of the pliers and the pressure of application to achieve a firm fit without over-squeezing. This only needs to be done once per installation.

4. Presionar con suavidad la cuña en el interior del clip con el alicate previamente ajustado. Las piezas de cerámica se nivelarán al ejercer presión la cuña sobre las piezas contiguas, no es necesario aplicar una gran presión sobre el conjunto. Pressure the wedge gently until the tiles level. Do not over-squeeze. Tiles will level naturally when wedge is inserted firmly.

5. Dejar secar el adhesivo siguiendo las instrucciones del fabricante. Allow the adhesive to dry following manufacturer's instructions.

6. Un vez seco el adhesivo, golpear el clip y la cuña en sentido perpendicular a la cuña. No extraer la cuña antes de romper el clip. Break the clip sideways. Do not remove the clip before breaking. Break with a rubber hammer or by kicking the piece.

SISTEMA ECO PARA REVESTIMIENTOS Y FORMATOS PEQUEÑOS Y MEDIANOS
ECO SYSTEM FOR WALL AND SMALL AND MEDIUM FLOOR TILES
SYSTEME ECO POUR REVÊTEMENTS ET PETITS ET MOYENS FORMATS
SISTEMA ECO PER RIVESTIMENTI E PICCOLI E MEDI FORMATI

Sistema de nivelación de dimensiones muy compactas, disponible para junta de 1 mm. de espesor especialmente indicado para los formatos de cerámica más pequeños. Gracias a sus reducidas dimensiones, puede utilizarse en zonas de instalación más complicadas por el reducido espacio existente o en las que no puede utilizarse el alicate de forma cómoda, presionando simplemente con la mano.

A levelling system of reduced dimensions, available in 1 mm. width, specially designed for use with smaller wall and floor tiles. One of its main advantages is that thanks to its reduced dimensions, the system can be used in smaller spaces where use of the pliers is difficult, with the wedge easily inserted by hand.

COMPLEMENTOS PARA LA CONSTRUCCIÓN

Crucetas, perfiles para yeso y monocapa, junquillos y juntas de dilatación.

COMPLEMENTS FOR CONSTRUCTION

Cross spacers, gypsum trims, angle beads, batten profiles and expansion joints.

COMPLÉMENTS POUR LA CONSTRUCTION

Croisillons, profilés en plâtre et monocouche, junquillos et joints de dilatation.

COMPLEMENTI PER COSTRUZIONE

Crocette distanziatori, profili per gesso e monostrato, junquillos e giunti di dilatazione.

RECOMENDACIONES DE COLOCACIÓN Y LIMPIEZA

PVC

- 1.- Alinear correctamente el perfil en la esquina, asegurándose que el material utilizado para la colocación pase a través de los agujeros en el ala troquelada del perfil.
- 2.- A continuación, colocar las piezas de revestimiento, presionándolas sobre el ala del perfil para asegurar una buena fijación.
- 3.- Una vez finalizado este proceso, tan solo quedará limpiar minuciosamente el material de colocación sobrante.

La mayoría de productos de limpieza que podemos encontrar en el mercado, no afectan ni alteran el PVC en la gama de colores lisos. Sin embargo, la manipulación y limpieza de los perfiles decorados es muy delicada, recomendando su limpieza solamente con agua limpia y un paño o esponja no abrasivos.

ALUMINIO

- 1.- Alinear correctamente el perfil, asegurándose que el material utilizado para la colocación pase a través de los agujeros del ala troquelada del perfil.
- 2.- A continuación, colocar las piezas de revestimiento, presionándolas sobre el ala del perfil para asegurar una buena fijación.
- 3.- Una vez finalizado este proceso, se procederá a la limpieza inmediata y cuidadosa del perfil. Este es un punto de gran importancia, debido a que el anodizado de los perfiles de aluminio es muy sensible a los materiales alcalinos y otros compuestos presentes en los materiales de fijación. Recomendamos su limpieza con agua limpia y jabón neutro, utilizando un paño o esponja no abrasivos.

sivos. De esta forma, se evitará la aparición de manchas por corrosión en el anodizado y cambios de aspecto no deseados.

ACERO

- 1.- Alinear correctamente el perfil, asegurándose que el material utilizado para la colocación pase a través de los agujeros en el ala troquelada del perfil.
- 2.- A continuación, colocar las piezas de revestimiento, presionándolas sobre el ala para asegurar una buena fijación.
- 3.- Es muy importante que, una vez finalizado el proceso de colocación, se proceda a la limpieza inmediata del perfil para evitar cambios de aspecto y posibles marcas por corrosión. Recomendamos su limpieza con agua limpia utilizando un paño o esponja no abrasivos.

IMPORTANTE

Tonos:

Debido a las características de las materias primas utilizadas en la fabricación de nuestros productos, es posible que haya variaciones de tono entre diferentes producciones. Por este motivo, no se aceptará ninguna reclamación por diferencia de tonos.

Incidencias en el transporte:

En el caso en que la empresa organice el transporte de la mercancía, al recibir el pedido, será imprescindible que el comprador revise la total conformidad y el perfecto estado del mismo. Si no estuviere de acuerdo con los productos entregados, para poder efectuar una reclamación por daños en la mercancía, el comprador deberá firmar e indicar a mano en el albarán de entrega de la agencia de transporte las anomalías encontradas al recibirlo (Ejemplo: embalaje en mal estado, no coincidencia entre el número de bultos entregados y el número de bultos que figura en el albarán de entrega, etc.). El plazo máximo para efectuar la reclamación será de 7 días. De no cumplirse con todo lo anteriormente expuesto, el comprador no podrá reclamar daños a la agencia de transporte y la empresa no podrá asumir responsabilidades por cualquier daño o pérdida.

FIXING AND CLEANING INSTRUCTIONS

PVC

1. Line up the trim carefully along the corner, making sure that the fixing material passes through the holes on the fixing wing.
2. Install the tiles, pressing on the fixing wing in order to ensure a perfect finish.
3. Carefully clean away excess fixing material.

The majority of cleaning products on the market will not damage or discolour your plain coloured PVC trims. However, decorated finishes are more delicate, and they should be carefully cleaned with a damp non-abrasive cloth or sponge.

ALUMINIUM

1. Line up the trim carefully along the corner, making sure that the fixing material passes through the holes on the fixing wing.
2. Install the tiles, pressing on the fixing wing in order to ensure a perfect finish.
3. Carefully clean away excess fixing material. This is crucial as anodized aluminium may be damaged by alkaline and other ingredients contained in fixing material. We recommend cleaning the trim with clean water and neutral detergent and a non-abrasive cloth or sponge. Immediate cleaning is required to avoid corrosion stains on the anodized finish and unwanted change in the appearance of the trim.

STAINLESS STEEL

1. Line up the trim carefully along the corner, making sure that the fixing material passes through the holes on the fixing wing.
2. Install the tiles, pressing on the fixing wing in order to ensure a perfect finish.
3. Carefully clean away excess fixing material to avoid possible corrosion stains and changes in the appearance of the trim. We recommend cleansing with a non-abrasive cloth or sponge.

IMPORTANT

Tones:

One of the normal characteristics of the raw material used in the manufacture of our products is the possibility of tone variations in different production runs, and so no claims can be accepted for this concept.

Transport:

If the company organizes delivery of the merchandise, the purchaser must check the merchandise upon receipt of the material, ensuring that the products correspond to the material sent and indicated on the delivery slip and that the material shows no sign of damage and is in perfect condition. If any discrepancy exists either in the quantity of material delivered or in the state of the material, then all damages and shortages should be noted on the transport agencies delivery slip (for example, damaged material, discrepancy between amounts delivered and amount on delivery slip etc.). All claims must be made within 7 days of reception of the merchandise. No claims will be accepted after this period. If no discrepancies are noted upon reception, neither the transport agency nor the company can accept claims for damages or loss.
